

How an APL Prototype Helped Designing a Service

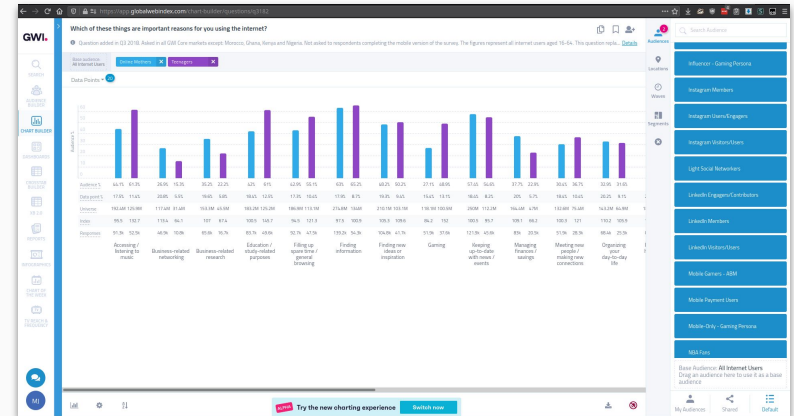

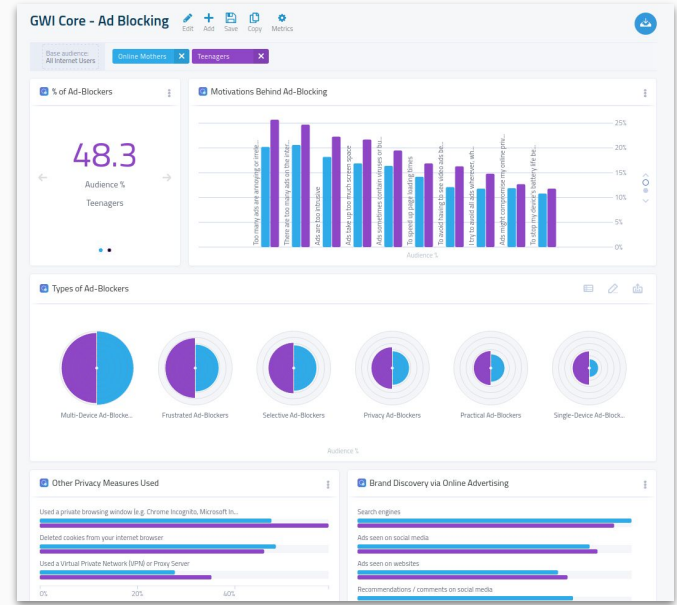

Martin Janiczek, GWI

GWI

- globalwebindex.com
- market research:
 - collecting surveys
 - cleaning the data
 - let users explore, query, plot, export the data

Category	Device	Usage	Revenue	Ad Spend	CPA	CPM	CTR	Conversion Rate	ROAS

Aa

N Chambers

A prototype distributed database for GWI

A distributed database and aggregation service optimised for GWI survey data, with heavy dependency on Redis, Google Pub/Sub and Roaring Bitmaps.

The project consists of 3 applications:

- [odb](#) is the calculation engine which responds to queries
- [gza](#) is the audience service which derives and creates audiences
- [rza](#) listens to pub/sub and writes updates to Redis

WARNING

This is not ready for general use yet.
